AMP PROMOTES GRODECKI TO VICE PRESIDENT OF BUSINESS SERVICES AND MEMBER CREDIT COMPLIANCE

COLUMBUS, OH: American Municipal Power, Inc. (AMP) is pleased to announce that Paul Grodecki has been promoted to vice president of business services and member credit compliance.

In his new role, he will be responsible for the management and oversight of the credit programs for member communities, fostering positive, open and timely two-way communications with community representatives, third party consultants, engineering firms, legal, tax and bond counsel, as well as assisting with other business related matters.

Grodecki joined AMP in the risk department in 2016 as director of internal audit and was promoted to assistant vice president of business operations later that year. Prior to AMP, Grodecki held several leadership positions within a professional consulting firm, including director of legal and government contracts and chief operating officer. He was a member of the firm's board of directors and chaired both the finance and audit, and leadership development & succession planning committees.

"Paul's background, knowledge and expertise will be an asset to the AMP organization and to our members," said Marcy Steckman, AMP senior vice president finance/CFO.

Grodecki is a registered professional engineer and attorney, holding civil engineering and law degrees from Cleveland State University, with experience in construction, real estate development and architectural/engineering/geospatial consulting.

ABOUT AMP:

American Municipal Power, Inc. is the nonprofit wholesale power supplier and services provider for 135 member municipal electric systems in the states of Ohio, Pennsylvania, Michigan, Virginia, Kentucky, West Virginia, Indiana, Maryland and Delaware. Combined, these public utilities serve more than 650,000 customers. AMP members receive their power supply from a diversified resource mix that includes wholesale power purchases through AMP and the open market and energy produced at AMP and member-owned generating facilities utilizing fossil fuel, hydroelectric, solar, wind and other renewable resources. For additional information, visit AMP's website at www.amppartners.org.
