AMP SEEKS REQUEST FOR PROPOSALS ON CARBON OFFSETS/CARBON OFFSET PROJECTS

COLUMBUS: American Municipal Power, Inc. (AMP) has issued a request for proposals (RFP) for voluntary carbon market projects that are capable of generating carbon offsets in accordance with the various American Carbon Registry (ACR) or Climate Action Reserve (CAR) standards, protocols and methodologies. Proposed projects must be located within AMP's seven-state footprint of Delaware, Kentucky, Michigan, Ohio, Pennsylvania, Virginia and West Virginia.

At this time, AMP is limiting proposals to the following categories: forest management; afforestation and reforestation; coal mine methane; landfill methane; wastewater treatment; and anaerobic digestion.

There is no requirement that electric generation (kilowatt hours) be included as a product of these carbon offset projects, but projects with an electric generation component will not be rejected for that reason. AMP will review proposals for both existing projects that can meet the ACR/CAR criteria as

well as proposals for new projects. Accepted project(s) will be subject to independent measurement and verification procedures in accordance with the appropriate standard or protocol. **Electronic proposals are due no later than 5:00 p.m. Eastern time on Friday, March 14, 2014.** Proposals are to be submitted to:

Cody Dill, Environmental Engineer
American Municipal Power, Inc.
1111 Schrock Road, Suite 100
Columbus, OH 43229
Email: cdill@amppartners.org

Both hard copy and electronic submissions of the proposal are required. The electronic copy must be submitted by the requested time and date. The hard copy may be submitted within 72 hours of the electronic submittal.

For more information on proposal submissions, including scope of work, schedule, commercial terms and form of proposal, please visit http://amppartners.org/pdf/RFP_for_carbon_offsets_FINAL_Feb-7-2014.pdf.

AMP's interest in carbon markets stems from its early participation in the Chicago Climate Exchange (CCX). Since 2010, AMP has developed two carbon forestry (reforestation) projects in Ohio – 25 acres with the Ohio Department of Natural Resources – Division of Forestry and 185 acres with the Columbiana County Park District. AMP's efforts to develop similar projects is continuing, but carbon offset diversification is desired as well.

ABOUT AMP:

American Municipal Power, Inc. is the nonprofit wholesale power supplier and services provider for 129 member municipal electric systems in the states of Ohio, Pennsylvania, Michigan, Virginia, Kentucky, West Virginia and Delaware. Combined these public utilities serve more than 625,000 customers. AMP members receive their power supply from a diversified resource mix that includes wholesale power purchases through AMP and the open market and energy produced at AMP and member-owned generating facilities utilizing fossil fuel, hydroelectric, wind and other renewable resources. The organization is focused on sustainability and increased use of renewable generation resources. AMP currently has four run-of-the-river hydroelectric projects under construction on the Ohio River. Combined these four projects will add more than 300 MW of new hydro capacity to the region. AMP is pursuing additional hydro, solar, wind and landfill gas projects. For additional information, visit AMP's Web site at www.amppartners.org.
